PROJECTS INVOLVED

Online bus ticket booking

Online simple bus ticketing system using python django, sql and Apache Tomcat.

https://github.com/Sanjiil/online-bus-ticketing

Nivid school management system

As a manual tester for Nivid, a School Management System, I meticulously ensured the reliability and functionality of the software. Conducted comprehensive testing, documented and reported issues, and collaborated with the development team to implement effective solutions. Contributed to the delivery of a robust and user-friendly system for efficient school management.

Hissav billing and accounting software

As a manual tester for Hisaav, I meticulously ensured the quality and reliability of the billing and accounting software. Conducted thorough testing, identifying and documenting potential issues to enhance the overall functionality. Collaborated with the development team to implement effective solutions and contribute to the delivery of a robust and error-free product.
